Edrei Aquino

Deelan David

* Real-Life Affordance

1. Sign with arrows in a circle

- it signifies a roundabout, showing which direction the roundabout flows instead of straight.

2. White dash with red background

- it means do not enter, a perfect example of affordance since you know what to do based on what you see.

* Real-Life Consistency

1. Everyday studying

- it helps you remember lessons better because consistent review improves memory

2. Daily Archery Training

- it improves accuracy & focus because consistent practice builds long-term skill

★ Software/Digital Affordance

1. Undo Button

- represented with an arrow pointing to the left, which indicates something going back, since interfaces follow a right to left layout, makes it obvious to go back/undoing.

2. Grocery cart icon Button

- grocery carts are commonly associated with buying, making it obvious to the user that there is a shopping system if checked.

★ Software/Digital consistency

1. Microsoft Office

- ribbon layout between apps showcases internal consistency

2. Adobe Applications (Layout)

- The layout of an adobe application are the same, with a few minor tweaks, also a showcase of internal consistency
